

# Place your bets now!

## Introduction

**Your** guests will be divided into teams at the tables during dinner. Each table will represent one team. Each team will be present with an amount of yen.

Enter, your fun presenter, who will guide the teams throughout the night.

After the meal the teams will be presented with a number of challenges for three to four contestants. Each visual challenge takes place one by one. These contestants will be battling it out in their challenge to hopefully win an individual trophy and spot prize. (Not included in quote)

Just before these contestants start the game, the teams have to place a bet on who they think will win the challenge. This can be done at the tote supplied using the fun money and betting slips supplied. All bets are double or loss, so the team have to be careful how much of their teams fun money to place on the challenge.

So, the contestants can win prizes as their motivation and the teams have to make serious cash to stay in the game. After all the challenges have been completed and winnings have been counted, your host will eliminate the teams by way of monetary value. The last team standing will be the champions and can win trophy and prize of your choice.

**A list of games can be available to organisers on request.**

## Cost

All costs are based on the size of the group and location of the event.
